GLOBAL CCS
INSTITUTE

OUR MISSION IS TO ACCELERATE THE DEPLOYMENT
AND COMMERCIAL VIABILITY OF CARBON CAPTURE
AND STORAGE (CCS) GLOBALLY.

The Global CCS Institute is the world's leading authority on carbon capture and storage (CCS) – an international climate change organisation whose mission is to accelerate the deployment of CCS as an imperative technology in tackling climate change and providing energy security.

With a team of over 40 professionals working with and on behalf of our Members, we drive the adoption of CCS as quickly and cost effectively as possible by sharing expertise, building capacity and providing information, advocacy and advice to ensure this clean technology can play its vital role in reducing greenhouse gas emissions.

Our diverse international membership includes governments, global corporations, private companies, research bodies and non-governmental organisations; all of whom are committed to CCS as an integral part of a clean energy future.

We are headquartered in Melbourne, Australia with offices in Washington DC, London, Brussels, Beijing and Tokyo.

THE INSTITUTE

Our activities are focused on achieving three goals.

BUILD KNOWLEDGE

As the world authority on CCS, we are an unparalleled source of research, data and information on all aspects of CCS deployment, reflected in the products described within this document.

The Global CCS Institute offers expertise and knowledge across every aspect of CCS. We provide our Members with accurate, insightful and impactful information and data about CCS, assisting them to build knowledge, connect with the right people and make informed business decisions.

No other organisation has the holistic capabilities or CCS expertise on a global scale. Our team includes geologists, scientists, engineers, economists, policy analysts, climate change experts, business developers and marketers, who provide expertise across the entire CCS spectrum.

SHIFT THE NARRATIVE

We promote and build awareness of CCS and its vital role in achieving energy security and emissions reductions targets to key media outlets, policymakers and important influencers around the world. This is critical given the proliferation of mis-information regarding the reliability, economics and applicability of CCS.

ENABLE INVESTMENT

We work with our Members and other businesses and governments, leveraging our CCS knowledge, skills and expertise, to enable investment in the next wave of CCS facilities. As policy and legislative changes create renewed opportunities around the world, now is the time to drive this investment.

VALUE THROUGH KNOWLEDGE

As the world authority on CCS, we are an unparalleled source of research, data and information on all aspects of CCS deployment. Our key knowledge products include:

CO₂RE™

Launched in 2018, our CCS intelligence database provides Members with exclusive access to the most current data, information and analysis of global CCS facilities, policy, storage, legal and regulatory and emissions information from across more than 50 countries. The graphical user interface makes it easy for users to navigate and find exactly what they are looking for in a fraction of the time it would otherwise take them.

THOUGHT LEADERSHIP

Members receive exclusive access to our CCS expertise and Thought Leadership services. We regularly publish reports, conduct analysis and provide advice and information on CCS economics, technology development, storage, policy, legal, regulatory and community engagement.

GLOBAL STATUS OF CCS REPORT

Every year, the Institute publishes the Global Status of CCS - a flagship publication for policy-makers and businesses to understand CCS and its vital importance to a low-emission future. The CCS community and energy/climate stakeholders depend on the Status Report to provide them with the most current data on the state of play of all things CCS – including facilities, policies, technology development, and the role of CCS in addressing energy security and emissions reductions. Government and private sector organizations alike use this information to help plan for future deployment, so its continued publication is critical to build momentum for CCS.

ACCESS GLOBAL CCS CONSULTANCY

BESPOKE CONSULTANCY

As a membership benefit, the Institute combine its CCS knowledge, skills and expertise to offer Members customized consultancy, research and projects to meet their specific needs. We work with our Members and clients to develop and incorporate CCS strategy into their existing business plans and goals. Our consultancy services include CCS Market and Policy Analysis, Order of Magnitude Pre-Feasibility Studies, CCS Legal and Regulatory Framework Design/Assessment and much more.

SPECIALIST CCS RESOURCES

Members can reduce external consulting and specialist staffing costs by leveraging the resources and expertise of over 40 CCS professionals located worldwide.

PUBLIC & COMMUNITY ENGAGEMENT SERVICES

We have developed a full suite of public engagement services, grounded in 10 years of best practice research and direct CCS project experience.

ADVICE & CAPACITY-BUILDING

POLICY ADVICE

Members receive practical policy advice on CCS through access to various technical reports, economic analysis and strategic counsel on all aspects of CCS deployment.

EVENTS AND WEBINARS

The Institute hosts a range of professional development opportunities and are leaders in CCS capacity-building through our tailored workshops, events, webinars and presentations.

COMMUNICATIONS, ADVOCACY & ENGAGEMENT

ADVOCACY

We advocate for and build awareness of CCS and its vital role in achieving climate targets across our networks and the global media. This includes the design and management of noteworthy events and launches to promote CCS activities, milestones and developments.

ENGAGEMENT

As the world authority on CCS, our membership is the broadest of any such organisation, encompassing diverse stakeholders representing business, government, researchers and NGOs. We can facilitate high profile engagements for Members as well as create public and community awareness and opportunities for engagement.

ACCESS TO INFLUENCERS

The Global CCS Institute's global convening power enables our Members to build connections with climate and CCS experts, public and private sector decision-makers and potential project partners to discuss key issues, obstacles and opportunities for CCS investment.

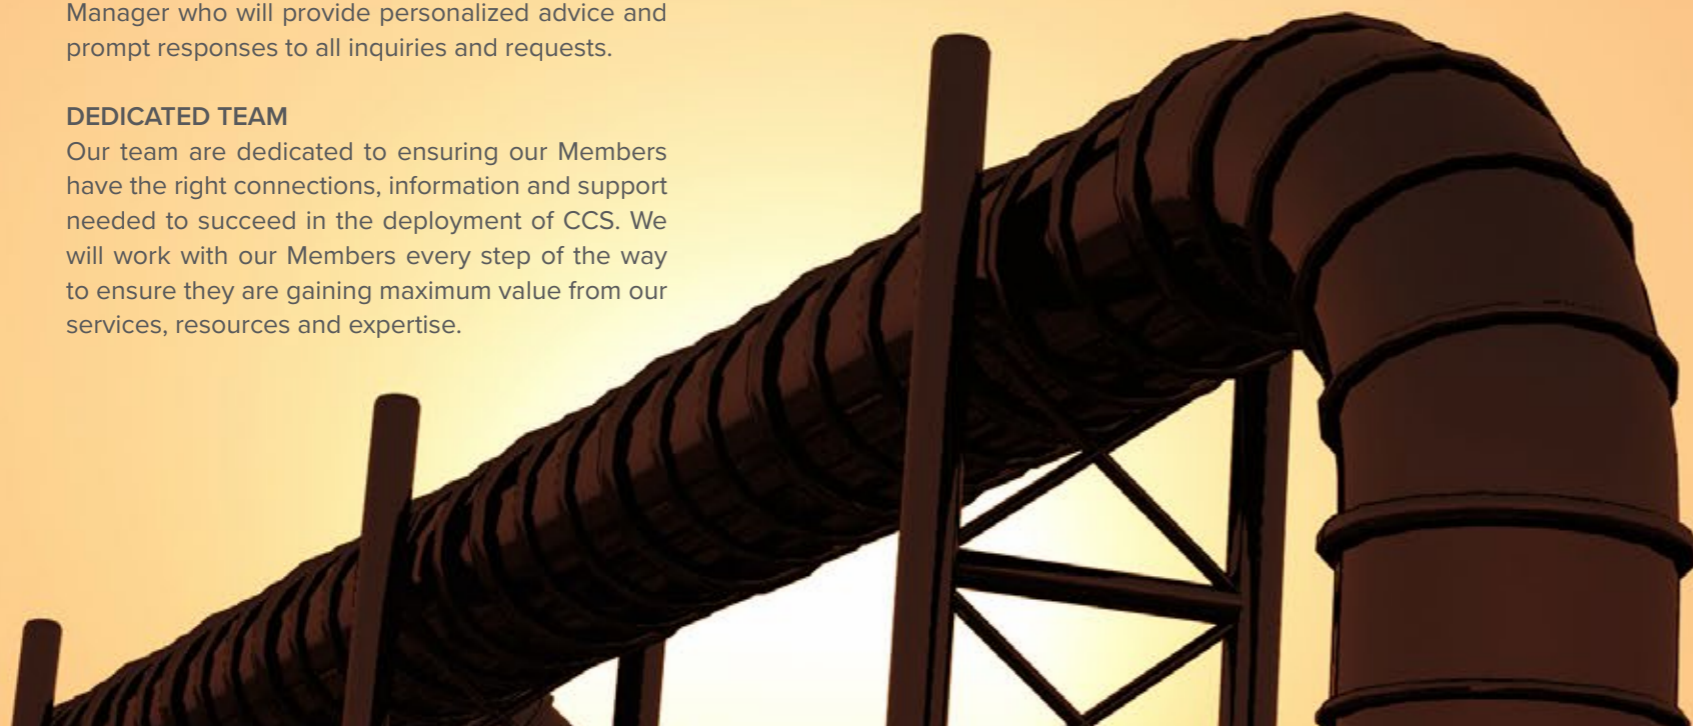

DEDICATED MEMBER SUPPORT

PERSONALISED SUPPORT

Our Members are paired with a Client Relationship Manager who will provide personalized advice and prompt responses to all inquiries and requests.

DEDICATED TEAM

Our team are dedicated to ensuring our Members have the right connections, information and support needed to succeed in the deployment of CCS. We will work with our Members every step of the way to ensure they are gaining maximum value from our services, resources and expertise.

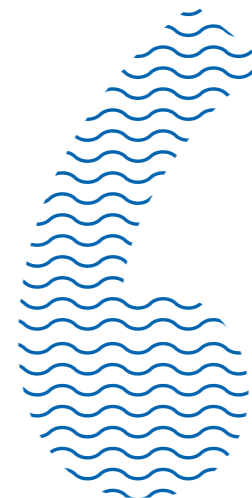

OUR MEMBERS

The Global CCS Institute boasts a diverse Membership profile that sets the foundation of an international community rich in knowledge and expertise.

Our Members are setting the course for the future of CCS. Institute membership is essential for organisations that seek to lead and be a part of an influential and collaborative community committed to accelerating the deployment of CCS.

LIU YANHUA

Chairman of the National Experts Committee on Climate Change, State Council Counselor and former Vice Minister of the Ministry of Science and Technology, PR, China

“Carbon Capture, Utilization and Storage (CCUS) is one of the important technologies for low carbon energy transition and green development. The Global CCS Institute, a highly professional and international organization focusing on the area, contributes positive and integral impacts to CCUS demonstration and large-scale commercial operation not only in China but also worldwide.”

YOSHIHIRO MIZUTANI

Director - Climate Change Policy Division,
Global Environment Bureau,
Ministry of Environment,
Japan (MoE)

“On behalf of MOEJ, I would like to express sincere appreciation to the Global CCS Institute, as one of MOEJ’s Sustainable CCS Consortium members, to provide access to leading knowledge and expertise on CCS. After MOEJ got a membership of the Institute, Global CCS Institute has provided us with daily news on CCS and distinguished reports analysis, such as a special report focusing on CCS technology, community engagement, and CO₂ shipping and two reports analyzing long term liability and regulatory options for geologically stored carbon dioxide.”

THOMAS WEBER

President, Jupiter Oxygen Corporation
Des Plaines, Illinois, USA

“Jupiter Oxygen Corporation is a US based clean energy company that has developed technologies for cost effective carbon capture with air pollutant control from fossil fuel power plants, and for industrial energy efficiency, which also reduces CO₂.”

The Global Carbon Capture and Storage Institute (GCCSI) has been very helpful to Jupiter Oxygen in supporting CCS technology by creating awareness and support for carbon capture technologies through active participation at the United Nations Climate Change conferences. GCCSI has been especially helpful at those meetings in presenting each year the status of CCS technology development globally, also insuring that carbon capture, utilization, storage or reuse technologies are recognized as one of the key solutions to the climate change issue. In particular, without the GCCSI’s involvement at the Talanoa Dialogue this year, carbon capture technologies would not have received the attention they deserve.”
